About us

Horizon International was founded in 2003 by leading professionals in the field of engineering and international business. They leveraged their experience with various global organizations to set up Horizon International which now serves 50+ clients in the Fortune 500 segment in India and Asia.

Horizon fulfils the needs of the manufacturing industry requiring innovative global sourcing solutions. We also provide innovative supply chain solutions for Vendor managed inventory (VMI) to various customers in Asia.

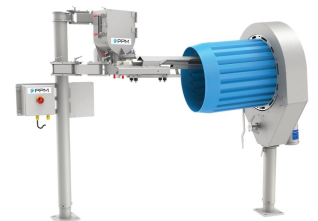

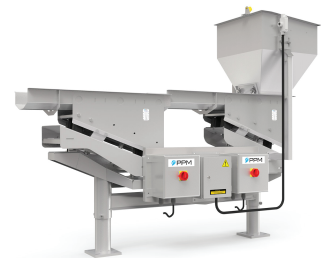

CUSTOMERS can rely on HORIZON for all their sourcing needs. Our one-stop-shop service ensures operational efficiencies and resource reduction, resulting in bottom-line savings. In cases where a company may have difficulties dealing with foreign vendors due to communication issues, payment terms, shipping or documentation requirements, HORIZON can be the solution.

PPM provides food handling systems which include vibratory and belt conveying, screening, grading and sizing conveyors for all types of fresh, frozen and processed foods.

PPM's Libra VF Mass Flow System employs a two-tier conveyor system that combines VF technology with load-cell scales, measuring product by both weight and volume. The Libra's loss-in-weight feedback system provides continuous, real-time product load measurements, adjusting product speeds to ensure feed rates are consistent and precise.

Plastic and stainless steel seasoning drums in both standard and custom sizes.

Electro Mechanical Conveyor

PPM's VF range of conveyors continue to be the reliable and proven workhorses of the food industry

Bucket Elevators

Designed to elevate a wide range of dry, free-flowing products, including nuts, snack foods, cereals, pet foods, confectionary products

Continuous Oil Fryers

They ensure proper oil management with automatic oil-level controls, continuous oil circulation, and a variety of filtration systems that help reduce oil loss and eliminate wastage.
